ABOUT

Hello! My name is David, my specialty is frontend development. I'm very good at minimalist design, although I like to go a little further. If you're looking for a frontend developer, look no further. I'm the person you need!

EXPERIENCE

*December
2023 -
Present*

Frontend Developer

Freelancer

I specialize in frontend technologies such as HTML5, CSS, JavaScript, TypeScript, React, Tailwind, Next.js, Git, github and Node.js. I have experience in challenging and exciting projects that have allowed me to develop strong skills in creating innovative and high-quality solutions. My main focus is on effective communication and timely project delivery.

PROJECTS

Bot Brittany

I developed a Telegram bot that teaches English interactively, guiding the user through thematic and dynamic conversations that encourage natural language practice.

Template

Create your own portfolio easily: beautiful, simple, and without leaving out any important information.

Deploy: <https://dalepp.netlify.app>

CineDataVault

Discover movies effortlessly: trailers, ratings, and all the details you need in one beautifully designed place.

Deploy: <https://CineDataVault.netlify.app>

GEVICA

Development of a web app for managing road infrastructure in Ciego de Ávila, featuring an interactive Leaflet map with Next.js and NestJS to improve visualization, monitoring, and planning.
